Extended Persian Tokenizer System study based on morphological analysis
Predicting the PVT properties of Iran crude oil by Neural Network
Object recognition methods as preprocess of object counting in BAL medical images

Amir Alimadadi

Full Stack Developer Specializing in Erp | Software Project Manager
| Data Engineer
Tehran, Tehran Province, Iran

Summary

I am a data and programming lover, with a fast-learning personality. With a rational mind, I always divide a huge problem into many micro problems and find a suitable solution for each one. I have valuable experience in developing, maintaining, and agile team coaching in enterprise software solutions (like ERP) in huge companies. I also have done some international projects for Calgary University and Chicago Stock Exchange in the platforms of .Net (Core and MVC), SQL Server, and React js. You can find some of my projects on my GitHub
